

Relay For Life 2024 Impact Report

American Cancer Society Relay For Life is the largest cancer walk in the nation. For nearly 40 years, communities across the world have come together to raise funds to help end cancer as we know it, for everyone - and we have no intention of ever slowing down. Funds raised through Relay For Life events directly support research, education, advocacy, and services for people with cancer and their families.

2024 by the Numbers

- Relay For Life events (US): **1,204 events**
