

## Where does the money go?

We're helping save more lives than ever before by empowering activists, conducting breakthrough research, providing patient services and access to care, and so much more!

In Indiana, an estimated 40,270 new cancer cases will be diagnosed in 2023, and 13,660 people are expected to die from the disease. But there is hope. With the support of volunteers, donors, and partners, we are fighting cancer on all fronts – and saving lives!
